

Help us provide stimulation packs to children in need during lockdown

We have handed out **2748** activity books since the beginning of lockdown. We would like to encourage caregivers to invest time in their children by providing them with **resources** and **activity ideas** to improve **holistic development** through **stimulation** at home.

We need your help to provide additional stimulation packs.

How your donation will help:

Families receive a stimulation pack with activity ideas (for 3-6 year old children) and parent wellness tips.

The pack was developed to inspire creativity, to empower parents and to ensure cost effective sustainability.

Your donation directly supports a household to provide vital stimulation to young children during the lockdown.

Most of the items are multipurpose and can be used for more than one stimulation activity.

R 75

one stimulation pack for one family

R 150

two stimulation packs for two families

R 750

Ten stimulation packs for ten families

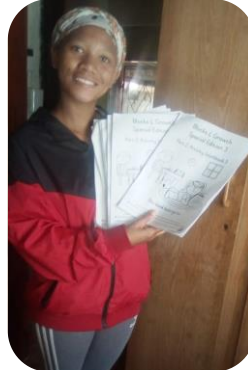

We are planning to start to distribute the packs during the first week of June.

Donate to our cause:

<https://thelearninginitiative.org/#give>

Through kindness and resilience we will all get through this difficult time together.

Help us provide stimulation packs to children in need during lockdown

Your donation, no matter how big, ensures that TLI is able to continue providing children with the vital and valuable building blocks promoting an **open mind** and educational growth.

Even if you cannot help us with any donation, please help us by **sharing** this post with your family and friends.
